

Pet Adoption

Team MACY: Michelle Lin, Anita Guo, Casey Hou, Yunkai Li

Intro

Purpose

- The adoptable animal information is scattered throughout
- One-stop platform centralizes adoptable animal profiles
- Exploration and management of favorite list in one place

- ☐ Sells/promotes non-animal related products
- ☐ Sells/promotes non-animal related services

Select All | Unselect All

What is your company's or organization's incorporation status? *

- ☐ for profit ☐ not for profit
- ☐ not incorporated

Please provide any information you'd like to share about your project.

RescueGroups.org

technology solutions animals can live with...

Hello,

Thank you for contacting us regarding using the [RescueGroups.org](#) API.

Shown below is your API key. The key is valid for both the HTTP and REST APIs.

Your API Key: 8FGSznHf

To edit your API Key, the following link will be valid for 30 days.

Your API Key Edit Link: https://rescuegroups.org/manage/public_apikey_edit?ak=8FGSznHf&t=y8SMkVYUXbsDq48

Please note that we track API keys by application and provider. If you are developing multiple applications or websites we'd prefer that you request multiple API keys.

Please refer to our online documentation for information regarding the API. If you have any questions, feel free to contact support, and we'd be glad to help!

Support: <https://www.rescuegroups.org/support>
API Documentation: <https://userguide.rescuegroups.org/display/APIDG>

We really recommend that you join our API Developers group here:

<https://groups.google.com/a/rescuegroups.org/forum/#!forum/apidev>

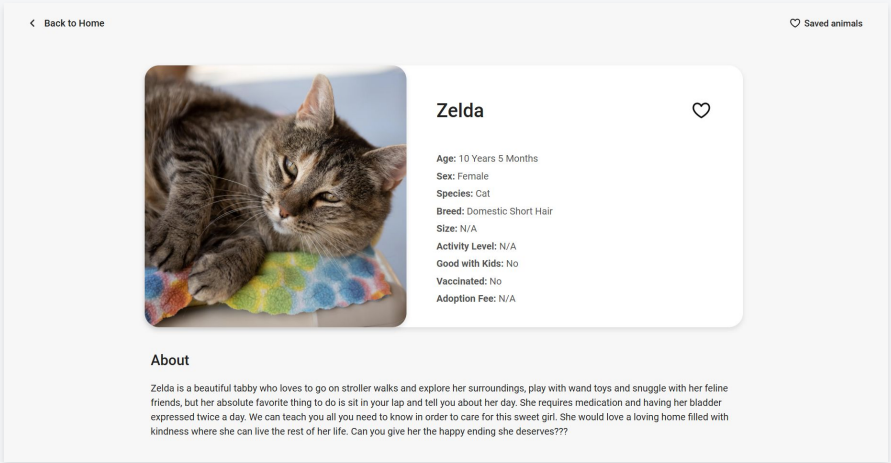

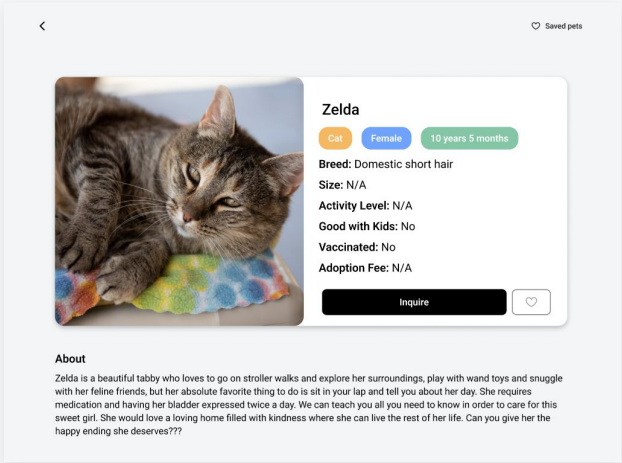

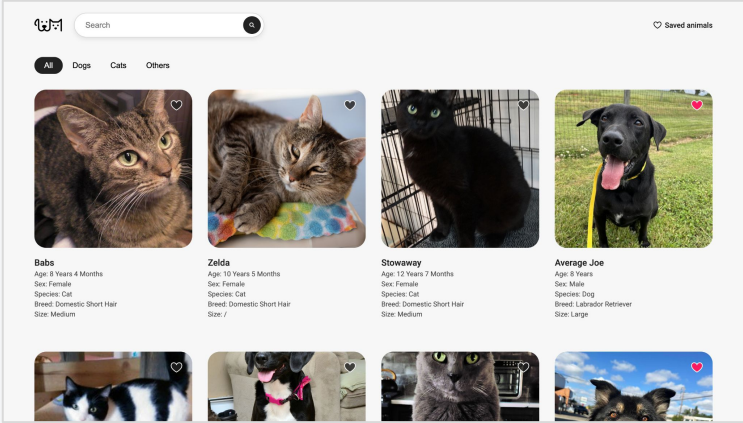

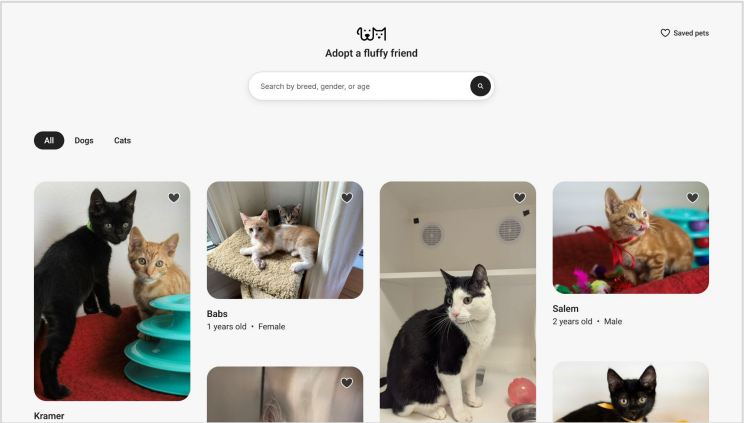

Thank you,

Design Iterations

Home page, Saved page, Detail Pages

- Fetched animal data from the API
 - useContext, useEffect
- Search by keywords
 - useState
- Filter by categories
 - useState
- ❤ Button
- A saved animals list in localStorage
- Different pages
 - Router
 - useNavigate

Conclusion

What we learned

- Workable API before making grand plans!
- Read documentations
- Communication and team collaboration
- GIT COMMIT!!!
